What is HEALTHFLO?

HEALTHFLO is an AI-native clinical and practice management platform that helps providers focus on what matters most - better patient outcomes. It streamlines operations, optimizes workflows, and supports intelligent clinical decision.

AI-Native Clinical Decision Support System (CDSS)

- Precision Diagnosis powered by advanced AI models
- Automated Treatment Plan for faster, evidence-based care
- Agentic Chat Interface for natural, language for intuitive clinician interaction
- Advanced Workflow Automation to simplify patient intake, scheduling, and communication
- Multi-lingual supporting voice-to-text consultations for over 22 Indian languages

Trusted by Healthcare Leaders

Developed in collaboration with healthcare providers, HEALTHFLO has earned the trust of leading hospitals and clinics nationwide by significantly reducing administrative burden while enhancing patient engagement.

Web & Mobile Native Platform | Microsoft Cloud - FedRAMP & HIPAA compliant

Accessible across web and mobile platforms, HEALTHFLO integrates seamlessly with your existing clinical environment, requiring minimal IT overhead while maximizing operational efficiency gains.

Key Features & Benefits

1

Smart Scheduling & Digitization

Intelligent appointment management system, AI based Digitization, and ID scanning such as **Adhaar** card, reducing wait times by up to 70% and eliminate data entry errors. Patients can schedule appointments online for a doctor or a service, receive secure messaging and automated reminders.

2

Automated Consultation Notes

Supports **voice-to-text documentation** in real time, generating structured consultation notes automatically. Enables **multi-lingual input** with support for **22+ Indian languages**, ensuring inclusive and efficient clinical documentation.

3

Agentic-AI Chat Assistant

Provides natural language-based Agentic-AI Chat Assistant as an alternate user interface for queries and actions.

4

AI-powered Quick Actions, Smart Plans, and Medical Calculators

Models around user behavior and learnings to provide enhanced experience.

5

360° Patient View

Delivers a **comprehensive health profile** powered by fine-tuned AI language models and advanced data insights-enabling clinicians to access a **complete, real-time view of patient health** for truly holistic care.

6

Connected Care Management

Specialist reviews and approval flows - ideal for **University Medical Hospitals**, and management of **Rural & Satellite Clinics** from anywhere!

7

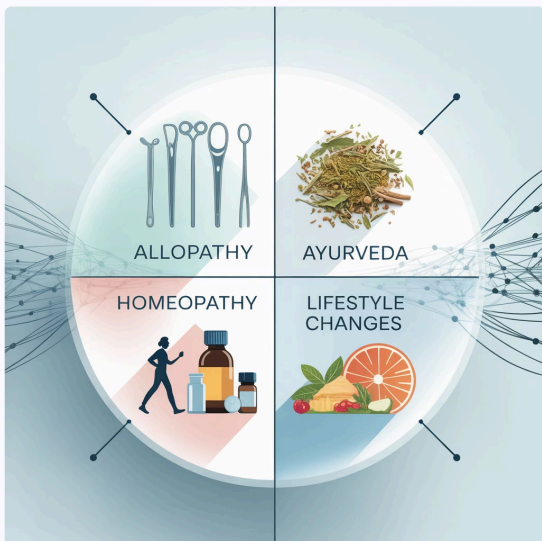

Pharmacy Inventory & Integration

Provides local pharmacy inventory management system and integrates with prescriptions generated through HEALTHFLO.

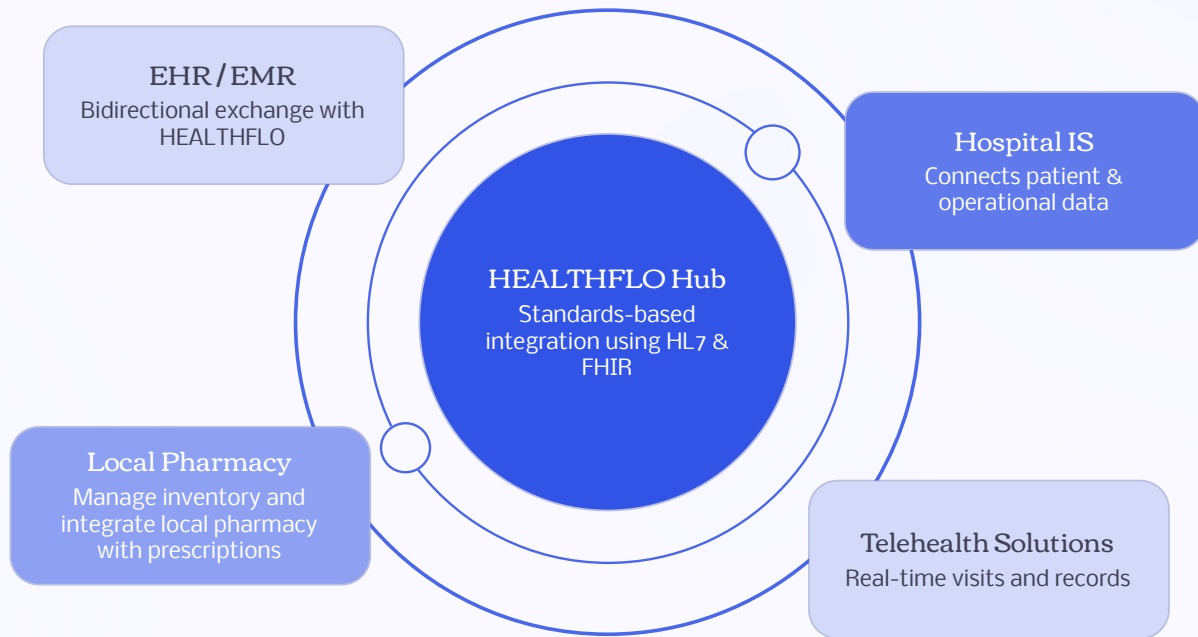

8

Extensible Healthcare Platform

Support a broad range of medicine systems - Allopathy, Homeopathy, and Ayurveda along with **Lifestyle changes**.

Interoperability & Integration

Standards-Based Architecture

Built on healthcare industry standards including HL7 and FHIR, HEALTHFLO supports seamless data exchange with all major EHR/EMR systems, ensuring compatibility and data integrity.

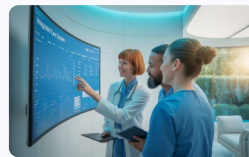

API-First Architecture

Our API-first architecture enables straightforward and flexible integration with hospital information systems, billing platforms, and telehealth solutions, tailored to your organization's specific technology ecosystem.

Multi-Site Support

HEALTHFLO supports complex multi-site deployments, enabling centralized management for hospital networks and large clinics while accommodating location-specific workflows and requirements.

Enhanced Care Coordination

By ensuring critical patient information flows securely and accurately across care teams, HEALTHFLO enhances coordination between departments and specialists, improving clinical decision-making and reducing duplication.

Proven Impact & Why Choose HEALTHFLO?

40%

Reduction in Wait Times

Streamlined intake processes significantly decrease patient waiting periods

85%

Diagnosis Accuracy

Improved diagnosis using all available data sources

65%

Admin Time Saved

Staff spend less time on paperwork and more time on patient care

HEALTHFLO is an innovative and flexible platform with amazing clinical accuracy.

"The ability to tailor AI-driven workflows to specific needs provides significant flexibility, making it easier for doctors to access relevant information efficient!"

We decided to move to HEALTHFLO for reduced wait times, improved patient satisfaction, and our staff can focus on delivering care instead of managing paperwork.
